

Clean Power. Complete Solutions.

NORTHERN LIGHTS

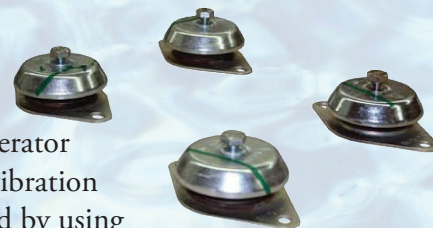

***Your Boating Experience Enhanced –
Improve Vibration and Sound Attenuation with Northern Lights Compound Mounts***

Northern Lights marine generator sets are world renowned for producing clean, efficient power in a quiet, dependable package. Now, you can enhance your overall boating experience even further with Northern Lights Compound Mounts.

Fitting beneath the generator set and its industry-best base frame, Northern Lights Compound Mounts reduce base frame vibration to a minimum. Add a Northern Lights sound enclosure and your set will run virtually noise-free, providing an ideally relaxing environment for everyone on board.

Northern Lights sets the industry standard for smooth, quiet generator operation. Optimal vibration attenuation is achieved by using components tough enough for the marine environment. Composed of industrial grade rubber and galvanized steel, Northern Lights Compound Mounts are corrosion resistant to last the life of your generator. They add only centimeters to the height of the generator set, ensuring that engine room space is not sacrificed for attenuation.

Model	Part Number
M673LD3, M673L3	33-88000
M773LW3	33-88600
M843NW3, M844W3, M844LW3, M864W3	33-82005
